

CLE233 MISSING NDBs – EUROPE:

Here is a short list in the 335 - 350 kHz range, made from the large number of NDBs that were missing from Europe's CLE233 logs and which may now be closed down.

I selected them using judgement, based on:

when they were Last Logged ('Last Lgd' below),
 their total number of reported Loggings ('Logs'),
 the number of radio countries ('RCs') from which they had been heard
 and those actual countries ('Heard In'), compared with where our CLE233 reporters were located.

Our thanks to Don who has searched the NOTAMs, etc., to confirm and explain their apparent disappearance where possible.
 His findings are in the final 'Notes' column.
 The list is in order of the 'Last Logged' dates.

'No info' means that Don could not find any 'official' reason like a NOTAM for the NDB to be off air.
Some of these could have been deleted and the NOTAM removed.
Any follow-up advice from listeners on the above, sent to the List, will be welcomed.

The equivalent list for North America will follow in due course.

(This is still a recently added kind of report - if anyone spots something wrong please let me know!)
