

CLE241 - MISSING NDBS

Here is our list for the 190-240 kHz range, plus the nnn.5 kHz NDBs, made from the large number of NDBs that were missing from our CLE241 logs and which may now be closed down. The entries were selected based on when the NDBs were **Last Logged** and their total number of reported Loggings (**Logs**).

Our thanks to Don who has searched the NOTAMs, etc., to confirm and explain their apparent disappearance where possible. His findings are in the final **Status** column.

The list is sorted in kHz order. There are seldom enough reception reports to recognise missing NDBs away from Europe and North America.

kHz	ID	Location	S/P	ITU	Notes	Heard In	Logs	Last Logged mm/dd/yyyy	STATUS

227	GW	'Aubon' De Kalb County, Auburn	IN	USA	Positive ID by Bill Hohnstein KÃ~HA - for the record, here's what others found when trying to track this one down: 'From the west' (Dave Tomasko, 2005-03-18) 'SE from Chicago, Daytimer' (Joe Mann, 2005-03-06) 'must be in my backyard. It's quite loud in broad daylight, totally obliterating SQ in Connersville, Indiana. GW rivals GR-263 (Grand Rapids, MI) and SB-341 (South Bend, Indiana) in strength. Both are about 50 miles away from me. I'd say GW is definitely in southwestern Michigan, northern Indiana, or northwestern Ohio' (Andy Robins, 2005-03-18)	AZ CO IA IL IN MI MN MO NB NC NH NJ NS NY OH ON OR QC TX VA WI	145	2/22/2018	Probably decommissioned - not listed or on charts

No info means unable to find any positive information to determine whether the NDB is decommissioned, withdrawn, awaiting repair or still actually active.

Decom = Decommissioned

OTS = Out of Service

..est are estimated dates.

Listed means the NDB is still listed as part of the airport's navigation systems.

On charts means the NDB is still being shown on current airport or approach charts.

We welcome any reports to NDB List with details of closures of your local NDBs.

This is inevitably not an exact science unless there have been recent loggings. NDBs often close without any formal confirmation and where there is a NOTAM, after a while it is removed. Also some NDBs, such as most of the European offshore beacons, remain potentially active but only re-appear for short periods after months or years.
