LISTENING PATTERN:

This table shows the activity of Don T (dn) and Doug (du) in the two hours before 23:59 UTC on 30th. Each 'dn' and 'du' shows the time and frequency of one of the 10 reported loggings by that listener. Don shows the typical pattern of someone tuning carefully from near the LF end (a welcome break at 23:00?). Doug's pattern suggests a more targeted approach.

It is interesting that nearly everyone tunes UP (i.e. from LF to HF), something that I have often noticed in past CLE results.
