

# CLE325 – MISSING NDBs:

Here is a list in the 350 - 370 kHz range, made from the large number of NDBs that were missing from the CLE235 logs and which may now be closed down.

I selected them using judgement, based on:

- when they were **Last Logged**,
- their total number of reported Loggings (**Logs**),
- the number of radio countries **Heard In**, compared with where our CLE235 reporters were located.

Our thanks to Don who has searched the NOTAMs, etc., to confirm and explain their apparent disappearance where possible, it was a difficult job for such a long list this time (but my holiday was the main reason for the delay).

Don's findings are in the final **Notes** column.

The list is still sorted in order of the **Last Logged** dates but Europe and North America are combined this time (mostly flagged by whether there is an entry for State).

PLEASE NOTE that in a few days (not yet!) Don and I will be inviting any comments on these lists – whether they are of any value to you and, if so, how we could improve them, maybe by changing the order of items, etc..

**No info** means that Don could not find any official reason like a NOTAM for the NDB to be off air. Some of those could have been deleted and the NOTAM removed.

Many of the NDBs shown as last heard in March and April 2018 are probably just due to poor propagation as there are no NOTAMs and they are still listed for the airport.

Any follow-up advice from listeners on this 350-370 kHz range, sent to the List, will be welcome. (This is still a recently-added kind of report and we have been trying to make improvements in it - if anyone spots something wrong please let me know!)
