

COMBINED RESULTS EUROPE

For overall statistics, please see the covering email.

Reporters:

Table listing reporters by country and name, including CZE, DEU, ENG, FIN, FRA, HOL, ITA, SAR, SCT, etc.

For full details, please see the individual reporters' logs, as previously posted by them to the List.

If you spot an omission or problem in your own details below please let us know (ndclea@gmail.com - replace the 'a' by an @ symbol)

BEACONS HEARD

Beacons are shown in kHz order within each country. The numbers shown within the table are the times in 'hh' UTC that the beacons were logged. (e.g. 01 indicates logged between 01:00-01:59 UTC).

Main table with columns for Country, Freq, ID, Name, and time slots (CZE, DEU, ENG, etc.) for various beacons.

This can provide each of us with an excellent way of measuring our personal progress by comparing our results THEN with our corresponding results NOW.

The upper table shows statistics for listeners who took part in both the events. The bottom lines compare the general conditions found during the two events.

Each listener's own results also depend, of course, on many other things, such as changes in receivers or aerials, time available for listening, use of recording equipment and maybe a move of QTH, as well as progress made through listening practice.

Comparing the results between individual listeners is not very meaningful - we each have so many unavoidable things that affect our ability to hear NDBs; where we and they happen to be, whether we are in a city or in wide open spaces or by the sea, our spending limit, how long we are able to devote to listening, etc.
