

# WORLD WEATHER FAX DATABASE

(SORTED BY FREQUENCY ORDER)

Version 1.0

Last updated 20th of May 2020

Compiled by Alan Gale, G4TMV

## NOTES:

- #1: The Country Identifiers used in this list are taken from the NDB List Country Code List [available from the NDB List website: <https://www.ndblist.info/info/countrylist.pdf>]
- #2: This list is aimed only at radio enthusiasts, and it goes without saying that it should not be used for any other purposes. The data can't yet be confirmed as being 100% accurate and up to date, so any updates or corrections would be greatly appreciated.
- #3: This list is was put together from various sources mainly to have a starting place to look for these signals, though it is quite possible that many of them are now inactive or closed, so any loggings would be very helpful in checking its accuracy, and details can be sent via the link below, and any updates or verifications would be greatly appreciated.
- #4: More information about Datamodes and the decoders that are available to receive them can be found at: <https://ndblist.info/datamodes.htm>

There is also a specialist group called the 'DGPS List' which covers this mode, to find out more you can visit the group's sign up page at: <https://groups.io/g/dgpslist/>

Updates for this list can be sent to: **<TSSupdates at ndblist.info> (replace the 'at' with @)**

## CREDITS & SOURCES:

**NOTE#** It goes without saying that this database is provided only for the use of hobbyists and should not be used for any other purposes. No claims are made about this being an accurate and completely up to date list, since even many of the "official" lists seem to have problems in obtaining up to date information about some of these stations. It should therefore only be considered as an attempt to create a workable list for enthusiasts to use. As always, any updates and corrections are greatly welcomed, especially details of any stations that are still active, and any conformation of their schedules would be a great help.

Most of the material in this database came from the following sources, my thanks to all of them, and my sincere apologies to anyone I accidentally left out (do let me know if you're not here and think you should be!):

Admiralty List of Radio Signals Volume 2

**DGPS List**

US Coast Guard NAVCEN
