

COUNTRY LIST

Revised: 11 June 2017

(Revision History is shown on last page)

Defining what is a “radio country” has been a problem for radio listeners since the DX hobby began. The following list is not an attempt to impose a standard on those who DX NDBs – only those who would like to apply for award certificates or participate in “Coordinated Listening Events” (CLEs). The list allows the listener and the coordinators of these programs to “sing from the same page” when it comes to counting “countries”. Use of the country codes listed below will also simplify the job of processing CLE logs.

This list was developed to give listeners seeking certificates a reasonably large number of “targets” within each geographic area. This serves both those new to the hobby and those who have been listening for a long time. It is important to emphasize that this list does *not* imply approval of current political boundaries, nor does it take a position on unresolved territorial, cultural, political or other disputes.

The list treats each US state and Canadian province as a separate “radio country”. That differs from most other lists of this kind but seems appropriate, given the realities of the hobby and the vast size of the North American continent. The same is true of Australia, where each of its states is also considered a separate “country” for our purposes.

Only one country is divided between continents: Russia. The portion west of the Urals is considered part of Europe while that to the east is in Asia. Turkey also straddles the line separating the two continents, however all but a small part of it is in Asia and that is where it is listed.

Not all of the countries listed may have active NDBs. Country codes in blue are unofficial. Wherever possible, standard International Telecommunications Union (ITU) three-letter country codes have been used. In cases in which these are not available, logical substitutes have been used (this includes several countries still using one-letter, pre-ITU codes (shown in brackets) as well as radio “countries” not recognized by the ITU). Most of the unofficial codes used in this list are already very familiar to radio hobbyists.

Note that abbreviations for the Australian states have been kept to two letters rather than the three-letter postal abbreviations used by several. This was done to prevent problems processing CLE logs.

Revision History

Nov 7, 2005:

- Added contact email, references and revision date
- Added VOI and RYI to Asia
- Moved OGA, OTS and MTS to Asia
- Deleted SPO in South America due to lack of evidence
- Added PPR, FDN and TMV to South America
- Split Antarctica into Mainland and four island groups (ATA, VPG, VPO, VPS and VPH)

Oct 23, 2006:

- Serbia & Montenegro, new 'official' ITU codes SRB and MNE replaced the previous SER and MON

June 10th 2017:

- Czech Republic now listed with its other new shorter name of Czechia
